

# ChargePanel Cloud - Enterprise Solution

*The Complete Software for Charge Point Operators*

ChargePanel's innovative technology takes care of the many technical tasks in the background that are required to operate all the charge points connected within a charging network. As an independent provider ChargePanel operates most brands of charge stations available on the market today and runs in the cloud for easy access across devices. ChargePanel's software for Charge Point Operators is supplied with a user-friendly Administrator account for the set-up and management of charging stations.

## ChargePanel's – Enterprise (White Label) Solutions contain the following account types

### ChargePanel Cloud - Enterprise Account

The Enterprise account provides one point of access for the management, functionality and operation of charge stations that are owned by separate businesses, organizations and charge point owners. The Enterprise Account is the management account for all Owner Accounts that are connected to it.

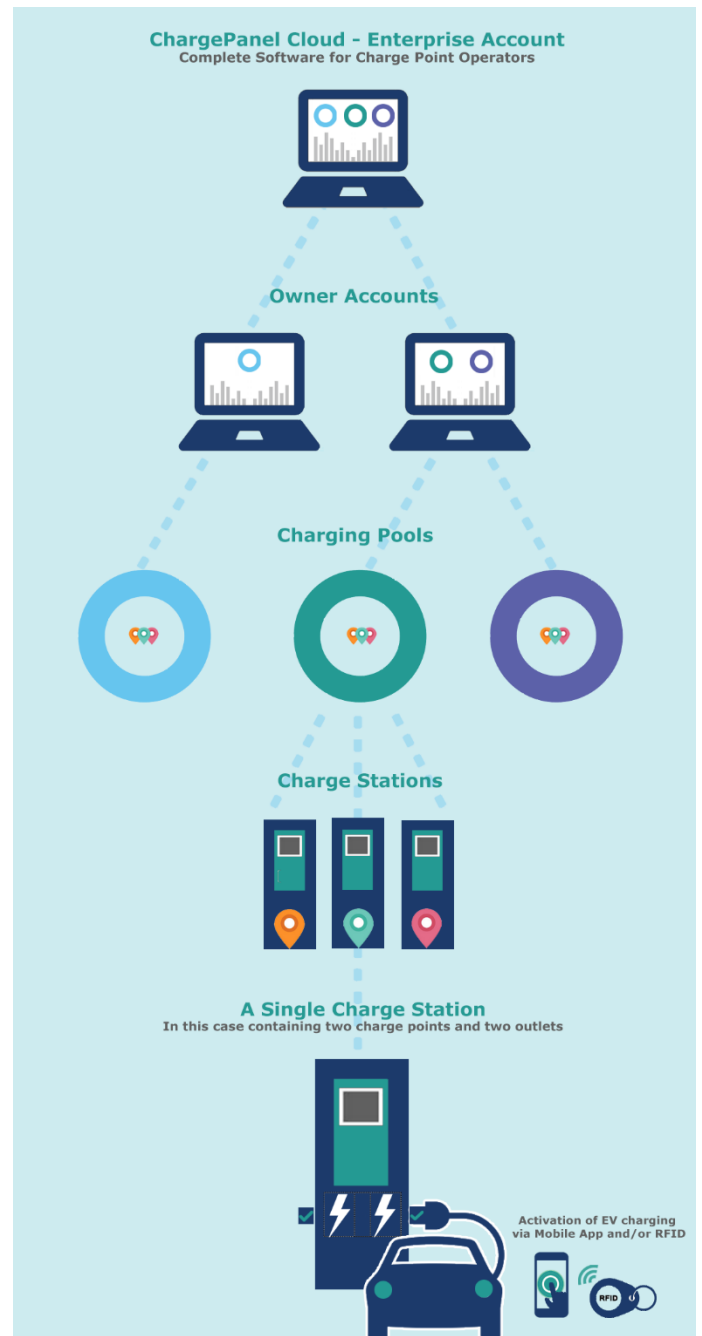

### ChargePanel Cloud - Owner Account

The Owner Account is the management account for a charge point owner, business or organization where the owner can view and manage pricing, operating hours, members and statistics, for their specific charge stations.

### Electric Vehicle - Driver Accounts

EV Driver Accounts are made available through the ChargePanel Connect Mobile App available for iOS (iPhone) and Google Play (Android). EV Drivers can log-in, activate and pay for charging in accordance with the specifications set in the Owner Account for a charge point. Drivers can also view their charging history and download receipts. Charging sessions can optionally be started via RFID where this functionality is both made available by the charge station and activated in the Owner Account.

The industry for electric vehicle charging is developing at a fast pace and so are the solutions we provide. This document is for informational purposes and may be updated with revisions and changes over time.

ChargePanel Enterprise Account Structure for Charge Station Management and Electric Vehicle Charging.
